

PRESS RELEASE January 31, 2013

PEFINDO'S Government-Related Entities Rating Methodology

PEFINDO adopts this methodology to assess the likelihood of the Government of Indonesia to support its subsidiaries in the event of financial and liquidity distress. PEFINDO's final rating will be a combination between the stand alone rating and degree of the likelihood of the support from the Government, the rating of which we assume as idAAA.

When assessing the likelihood of the Government's support, PEFINDO is using a basic rule that the more important the GRE's role to the Government, the higher the likelihood of Government support and the closer the GRE's rating to the Government's rating. As opposed, the less important the GRE's role to the Government, the weaker the likelihood of Government support and the closer the GRE's rating to its standalone. When analyzing degree of a GRE's role to the Government, PEFINDO will distinguish the GRE's role into three categories as critical, important, and limited importance.

The Government should be a controlling shareholder in these entities. Subsidiaries of State Owned Entities can also be considered as GREs, if PEFINDO believes that the Government support will be given directly to the subsidiaries. Attached is the list of ratings, to which PEFINDO applies the GRE rating methodology. Most of them are unchanged because degree of supports from the Government are already reflected in the final rating, but some ratings are upgraded because PEFINDO views the stronger likelihood of support using the methodology.
